

PyPDF Practice Document

Page 1: Artificial Intelligence

Artificial Intelligence is a field of computer science that focuses on creating systems that can perform tasks that normally require human intelligence. These tasks include learning, reasoning, understanding language, and recognizing patterns.

Page 2: Machine Learning

Machine Learning is a branch of Artificial Intelligence. It allows computers to learn patterns from data and make predictions or decisions without being explicitly programmed for every individual task.

Page 3: LangChain

LangChain is a framework for building applications powered by language models. It provides components such as document loaders, text splitters, prompts, retrievers, and output parsers.
